The strength of the Queens residential market was on full display during the last quarter of 2020, as evidenced by the overall median and average prices reaching all-time highs, climbing to \$650,000 and \$690,397, respectively.

Altogether, sales were up significantly compared to the start of the pandemic. In contrast to Q4 2019, sales were down 19 percent, not surprising given the Presidential election's uncertainty and concerns around the containment of COVID-19.

Queens is an inviting place regardless of what is happening globally, and buyers are drawn to its attainable prices and properties with ample

space. This last quarter, buyers were exceptionally interested in houses—the average and median prices jumped 8 percent and 9 percent, respectively—the highest increase of any property type. Furthermore, co-op performance held steady, and units only saw a limited sales change throughout the quarter compared to 2019. On the luxury side, properties priced above \$1 million saw an increase in market share. These figures solidify the prowess of the Queens residential real estate market.

Certain areas of the borough were especially noteworthy. Northeastern and Central Queens had the highest market shares of all submarkets at 30 percent and 29 percent. Northwestern

Queens had the highest median price at \$840,000, while Central Queens saw the lowest at \$532,500. The average price year-over-year was 12 percent lower in Northwestern Queens, resulting from lower-than-usual prices and higher discounts.

The last quarter of 2020 proved that Queens maintains its place as a prime destination for anyone looking for more space and lower price points than neighboring Manhattan and Brooklyn. With the presidential election in the rearview mirror and as the pandemic is controlled through vaccine distribution, the Queens market will only continue to flourish.

PRESIDENT, COMPASS TRI-STATE

# Methodology

**Geography** covered in this report is Queens.

**Inventory** is calculated based on all properties actively listed during the quarter at the time the report is prepared.

**Contract Signed** figures for the current quarter are based on publicly reported transactions at the time the report is prepared. The signed price reflects the latest available asking price.

**Recorded Sales** figures for the quarter are based on known closings recorded at the time the report is prepared.

**Median Price** is the middle price of a given dataset.

**Average Price** is the sum of all prices divided by the total number of properties.

**Months of Supply** is an estimated time it would take to sell all current active listings based on the trailing 12-month sales rate.

**Time on Market** is calculated by how many properties entered contract during the quarter in the given period.

**Discount** is the percentage difference between the initial list and recorded sale price.

**Current Quarter** is reflective of the initial day of the quarter until the 20th day of the quarter's closing month. These numbers will be updated in subsequent reports to reflect the dataset of the entire quarter.

## **Quarters**

Q1: January 1 - March 31

Q2: April 1 - June 30

Q3: July 1 - September 30

Q4: October 1 - December 31

# Recorded Sales

## BY PROPERTY TYPE

- Sales were down 14% but have bounced back significantly since the start of the year, a trend expected to continue with the promising contract activity experienced this quarter
- The overall median and average price reached all-time highs, climbing to \$650,000 and \$690,397, respectively
- House saw the largest price increases of any property type, increasing 8% and 9% in average and median price, respectively
- Condo prices saw their average price per square foot decline 13%, a result of smaller units selling for less amid new development availability
- Co-op performance held steady and units only saw limited change in sales throughout the quarter compared to 2019

# Recorded Sales

## BY PRICE POINT

- Properties sold for \$500K to \$750K had the largest market share, which has grown nearly 8% since 2010
- The \$750K to \$1M price bracket had the second largest market share, and has grown over 20% since 2010, clearly showing the rapid upward cost trend in the borough
- Both the \$500K to \$750K and \$750K to \$1M price points saw limited change in average and median price, suggesting properties are jumping in price, rather than slow, steady growth
- Luxury properties above \$1M saw slightly increased market share, but were down in total sales as expected
- Sales under \$350,000 saw limited change in price, their average and median both increasing 2%
- Northeastern & Central Queens had the highest market shares of any submarket, with 30% and 29%, respectively
- Northwestern Queens had the highest median price at \$840,000, while Central Queens saw the lowest of \$532,500
- The average price year-over-year was 12% lower in Northwestern Queens, a result of lower-than-usual prices and higher discounts, and it was the only submarket to decrease
